

DNYANESHWAR BHANDARI

DevOps Engineer

Pune, Maharashtra | [9322852969](tel:9322852969) | bhandaridnyaneshwar04@gmail.com | [LinkedIn](#) | [GitHub](#)

SUMMARY

Motivated Cloud and DevOps Engineer skilled in AWS, Docker, Kubernetes, Terraform, and CI/CD automation. Experienced in deploying scalable cloud applications, automating workflows with GitHub Actions, and managing Infrastructure as Code (IaC) using Terraform. Strong knowledge of security, Linux, and CloudWatch monitoring. Actively seeking an opportunity to start a career as a DevOps Engineer to contribute to team success and grow within the industry.

TECHNICAL SKILLS

- **Cloud Platforms:** AWS (EC2, VPC, IAM, S3, RDS, Lambda, CloudWatch, DynamoDB, Route 53).
- **DevOps Tools:** Docker, Kubernetes, Terraform, Ansible, Jenkins, GitHub, GitLab, Nginx.
- **Infrastructure as Code:** Terraform (VPC, NAT Gateways, Multi-AZ RDS).
- **Programming:** Python, Bash, SQL.
- **Networking:** TCP/IP, DNS, Load Balancing, NAT Gateways, Security Groups, HTTP/HTTPS.
- **Monitoring:** AWS CloudWatch, Prometheus (basic).
- **Operating Systems:** Linux, Windows.

PROFESSIONAL EXPERIENCE

- **Project Role: DevOps Engineer Trainee** | *June 2025- Ongoing*
Cravita technologies Pvt. Ltd.

PROJECTS

3-Tier Architecture Deployment on AWS

- Executed a highly available three-tier architecture using EC2, RDS, ALB, and Auto Scaling Groups within a custom VPC.
- Used Terraform to provision infrastructure with NAT Gateways, Route Tables, and Multi-AZ RDS instances.

CI/CD Pipeline Automation GitHub Actions and Jenkins.

- Established a complete CI/CD pipeline with GitHub Actions and Jenkins to automate build, test, and deployment stages.
- Utilized a distributed worker architecture to achieve scalability and parallel processing.

Containerized Node.js Application using Docker and Kubernetes.

- Containerized a Node.js application using Docker and Kubernetes, deployed on AWS EC2.
- Ensured repeatable and scalable releases through orchestrated container management.

Serverless File Processing System using AWS Lambda and S3.

- Developed a processing system using AWS Lambda, API Gateway, and S3.
- Implemented event-driven automation by triggering Lambda on S3 uploads and monitored performance using CloudWatch.

CERTIFICATION

- Python Programming Certificate
- Web Development Workshop Certificate

EDUCATION

- **Bachelor of Science (B.Sc.) in Computer Science** | 2023 – 2025
SREI's Samarth College of Computer Science, Belhe | **CGPA: 8.6**
- **Higher Secondary Certificate (HSC)** | 2022
Shri Sainath High Jr. College, Alkuti | **61.67%**
- **Secondary School Certificate (SSC)** | 2020
Shri Sainath High School, Alkuti | **88.88%**
